DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, is drawn to a product, classified in class 428, subclass 17.
- II. Claim 2, drawn to processes of manufacture, classified in class 140, subclass 92.3

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the article, of invention I, can be made by a different process not requiring bended wires running from the base of the loop to any other part of the loop inside the loop to provide support for the upper layer of the fabric and/or the separation from the lower layer, and also to create cavity formation inside the loop.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1775

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
